

b. good vogel

jazzaffine songs and grooves;
[electro/acoustic duo]

With their brand new project, „b. good vogel,“ Marc Vogel and Lukas Schiemer, aka Barry Good, combine modern jazz with popular groove music. Heavy contrasts stimulate senses and mood when elements like improvisation and slam poetry encounter conventional song structures, which, in turn, get together with groove and jazz.

Starting from their minimalistic acoustic setup, drums and saxophone, the musicians set foot on new terrain. Voice, synths, samples and loops are captured, generated and modified via masterkeyboard, sample pad and computer.

The use of extended electronics make it possible to increase the intimacy of the duo-setup to a seemingly far bigger ensemble - without losing its charm of authenticity and live-ness. The Austrian musicians are currently living in Vienna.

Demanding, acute, true to feeling.
